SUMMARY

Research Associate at Imperial College London, starting an AI in Policy Fellowship this coming June, with a PhD in Safe & Trusted AI, developing explainable, interactive causal discovery methods for high-stakes decision-making. As a key contributor to an ERC-POC grant built on my thesis, I'm now working towards applying my research in finance, healthcare and policymaking. I've published at AAAI, KR, ECAI, IJCAI, and CLeaR. With six years' experience consulting and leading data-science teams in banking, I bridge academia, industry and regulatory bodies to drive human-centred AI innovation.
